

I AM LOOKING TO CONNECT TWO MONITORS TO TWO DOCKING STATIONS.

The limitation appears to be the docking stations.

There is ONE commonality between them

Each station has

1 vga

1 hdmi

I have two docking stations

hP 1 vga, 1 HMDI

Dell, 2 dvi, 1 vga, 1 hdmi

I have two identical monitors, Each with

1 vga

2 hdmi

So, I am looking for a 2 montitor, 2 computer KVM switch whose connections are:

TO THE TWO MONITORS:

Either 2 hdmi, or 1 vga one hdmi , to the KVM switch

TO THE COMPUTERS

1 vga and 1 hdmi.

Cables

Currently I connect to my DELL docking station, with 2 hdmi to 2 dvi connections on the station

So from the monitors to the KVM, HDMI to DVI is an option
